

**Along with selecting one of our Preferred Customer Assurance Maintenance Programs you receive the following:**

- Preferred Customer **Priority Service 24 hours a day**, 7 days a week & Holidays
- A **15% Discount** on parts
- A **15% Discount** on labor for after hour emergency calls
- A **One Time \$300.00 Discount** for any new heating or cooling system replacement installed by Air Dynamics
- A **One Time \$50.00 Discount** on a duct cleaning.
- A **One Time \$100.00 Discount** on duct replacement.
- A **\$25.00 Discount** on a media air cleaner.
- A **\$50.00 Discount** on a humidifier installation for a warm air furnace or heat pump.

**Plan 1 – Preferred Customer Assurance Maintenance Program (Heating - Oil)**

**Includes:**

- Install new fuel nozzle
- Install new fuel filter
- Clean and adjust electrodes
- Perform combustion test
- Check all safety controls
- Check unit draft at flue pipe
- Check exhaust gases at flue pipe
- Oil circulator motors and fan motors if needed
- Perform a complete brushing and vacuuming of the heat exchanger & chimney base

**\$229**

**Plan 2 – Preferred Customer Assurance Maintenance Program (Heating - Natural or LP Gas)**

**Includes:**

- Clean ignition assembly
- Clean and adjust blower components
- Examine heat exchanger for damage and corrosion
- Adjust pilot light
- Adjust gas pressure
- Measure voltage and amperage on components
- Check draft at flue pipe
- Tighten all electrical connections
- Check all safety controls
- Check thermostat operation
- Lubricate all moving parts
- Clean condensate drains
- Test unit starting capabilities
- Check heating cycle

**\$149**

**Plan 3 – Preferred Customer Assurance Maintenance Program (Heat Pump)**

**Includes:**

- Two yearly services (one for the fall/heating season and the other for the spring/cooling season)
- Check refrigeration charge on system
- Check water flow (Geo-thermal)
- Check all piping for leaks
- Check all electrical connections
- Check indoor and out coils
- Check thermostat operation
- Check amperage draw at compressor and fan motors
- Check unit change over from heat to cool
- Check emergency heat operation
- Check ductwork for air leakage
- Check and clean condensate drain
- Check all safety controls
- Check unit's starting capabilities
- Check and record temperature difference between supply and return air
- Check and lubricate all moving parts
- Check air filter

**\$249**

**Plan 4 – Preferred Customer Assurance Maintenance Program (Gas Furnace with Air Conditioning)**

**Includes:**

- Two yearly services (one for the fall/heating season and the other for the spring/cooling season)
- **Heating season includes:**
  - Clean ignition assembly
  - Clean and adjust blower components
  - Examine heat exchanger for damage and corrosion
  - Adjust pilot light
  - Adjust gas pressure
  - Measure voltage and amperage on components
  - Check draft at flue pipe
  - Tighten all electrical connections
  - Check all safety controls
  - Check thermostat operation
  - Lubricate all moving parts
  - Clean condensate drains
  - Test unit starting capabilities
  - Check heating cycle
- **Cooling season includes:**
  - Check refrigeration charge
  - Check all piping for water leaks
  - Check all electrical connections
  - Check indoor/outdoor coils
  - Check thermostat operation
  - Check amperage draw at fan motors and compressor
- Check indoor and outdoor coils
- Check thermostat operation
- Check amperage draw at fan motors and compressor
- Check and clean condensate drain
- Check ductwork for air leakage
- Check all safety controls
- Check units starting capabilities
- Check and record temperature difference between supply and return air
- Check and lubricate all moving parts
- Check air filter

**\$269**

**Plan 5 – Preferred Customer Assurance Maintenance Program (Oil Furnace with Air Conditioning)**

**Includes:**

- Two yearly services (one for the fall/heating season and the other for the spring/cooling season)
- **Heating season service includes:**
  - Install new fuel nozzle
  - Install new fuel filter
  - Clean and adjust electrodes
  - Perform combustion test
  - Check all safety controls
  - Check unit draft at flue pipe
  - Check exhaust gases at flue pipe
  - Oil circulator motors and fan motors if needed
  - Perform a complete brushing and vacuuming of the heat exchanger and chimney base
- **Cooling season includes:**
  - Check refrigeration charge
  - Check all piping for water leaks
  - Check all electrical connections
  - Check indoor/outdoor coils
  - Check thermostat operation
  - Check amperage draw at fan motors and compressor
- Check and clean condensate drain
- Check ductwork for air leakage
- Check all safety controls
- Check units starting capabilities
- Check and record temperature difference between supply and return air
- Check and lubricate all moving parts
- Check air filter

**\$299**

**Plan 6 – Preferred Customer Assurance Maintenance Program (Air Conditioning)**

**Includes:**

- Check refrigeration charge on system
- Check all piping for water leaks
- Check all electrical connections
- Check indoor and outdoor coils
- Check thermostat operation
- Check amperage draw at fan motors
- and compressor
- Check and clean condensate drain
- Check ductwork for air leakage
- Check all safety controls
- Check units starting capabilities
- Check and record temperature difference between supply and return air
- Check and lubricate all moving parts
- Check air filter

**\$149**
